

# LYNX 4T

*Innovative, Enduring & Performant.*

MADE IN FRANCE

## DESCRIPTION

The LYNX 4T is a VTOL drone developed specifically for monitoring and surveillance applications. Its 50km range, its large autonomy, allow it to carry a payload of more than 3 kg, and to fly in a hostile environment for a period longer than of 5 hours. Virtually inaudible above 400 m thanks to its ultra-quiet 4T motor, the LYNX 4T acquires maximum stealth and agility in the harshest environments. Ideally equipped with a powerful surveillance system that can carry out day and night missions, its retractable landing gear provides total 360° vision, and its IP54 protection allows it to be used in all situations. Removable, its small size makes it easy to transport in a light vehicle. The LYNX 4T is the third essential eye of any operator.

## SPECIFICATIONS

**Lenght**  
2,55 m

**Empty weight**  
12 kg

**Width**  
0.70 m

**Implementation**  
20 mn

**Height**  
0.70 m

**Rotor diameter**  
2,2m

## PERFORMANCES

**Max Altitude**  
3000 m

**Cruse speed**  
60 km/h

**Relative Elévation**  
1000 m

**Max speed**  
120 km/h

**Max Take Off Weight**  
25 kg

**Operating Temperature**  
de -10 to +40° C

**Payload**  
1 to 8 kg

**Wind Resistance**  
Up to 70 km/h

**Autonomy**  
120 to 240mn

## APPLICATIONS
